

POST MOTOROLA ABHISHEK

Name of the person: Abishek VC

Job position: Representative / Investor

Institution: VC (Small investment firm)

Date of visit: May 17, 2026

What was good

- The call was successful and the contact demonstrated strong interest in the project.
- Introduced multiple relevant people within their network during the interaction, proving to be a high-value contact for ecosystem networking.
- Provided support and assistance regarding event logistics, specifically managing the event skates/skaters and community integration.

What wasn't good

- The firm cannot provide direct financial sponsorship or capital investment due to its small size as an investment entity.

What have we learned

- Contacts from smaller investment firms like ITA may lack the capital allocation for direct sponsorship but still offer high strategic value through networking, community reach, and logistical support.

What will we improve for the next time

- Pivot the pitch deck for similar small-scale investment firms to focus strictly on ecosystem partnership, community cross-promotion, and networking opportunities rather than direct capital requests.
